Professional Experience

I'm a full-stack developer with 14+ years building and optimizing web applications. These days I'm mostly focused on front-end work Vue.js, Angular, TypeScript — but I've got some server-side experience too (PHP, Node.js, API design, query optimization), and I still enjoy having a hand in both sides. I've led legacy migrations, the jQuery-to-Vue.js one at Setly being the big one, managed engineering workflows, and built web applications for global brands like LuxGive and onefinestay, plus a handful of agencies along the way.

I also like having a team around me and running things Agile-style rather than working solo.

Contract / Side Projects | Jan 2016 – Jan 2019

One Mineral Dev SRL | Side Projects

DARO MEDIA SRL & Graffino | Side Projects

Core Competencies

• Front-End Development:

Vue.js (Vue 2 / Vue 3), Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS / LESS / Stylus, Responsive Web Design, Component Architecture, Web Performance

• Back-End & CMS:

PHP, Node.js, WordPress (CTD), RESTful APIs, JSON, Query Optimization, OpenCart, PrestaShop, Magento

• Build Tools & Workflow:

Git VCS, Grunt, Gulp, Vite, Webpack, npm, CI/CD pipelines

• Methodologies & Tools:

Agile / SCRUM, UI/UX Best Practices, Cross-Browser & Mobile Optimization, Office 365, Asana, Trello, Linear, Notion

Interests & Hobbies

- Analytical Puzzles (Chess, Rubik's Cube, GeoGuessr),
- Woodworking & DIY Building, Gardening.

Education

Studied at Faculty of Engineering ULBS

Setly | Senior Full-Stack / Front-End Developer | Jan 2019 – Present

- Led the modernization of the flagship web application by migrating a legacy jQuery codebase to a modular Vue.js architecture to improve code maintainability and application performance. In this process also helping backend devs to create on site modules.
- I am currently managing a small team of developers alongside hands-on engineering duties- drawing on previous Head of IT experience to oversee task allocation, code reviews.
- Developed full-stack features with PHP, Node.js, and JavaScript, also Kotlin in our Android app, connecting responsive client interfaces to server-side APIs and database models.
- Ongoing now driving the migration from Vue 2 to Vue 3, introducing TypeScript and updated state management patterns.

IMC | Front-End Developer | Oct 2017 – Dec 2018

- My first touch in sprint cycles within an Agile/Scrum team, delivering platform features and resolving high-priority bug tickets for a large-scale system.
- Refactored legacy AngularJS components into Angular 2+, establishing modular, reusable component patterns.
- Improved database search response times by ~30% refining SQL query structures and optimizing front-end data handling.

SC I.T.N.T SRL | Front-End Developer | Aug 2015 – Oct 2017

- Built dynamic front-end interfaces that rendered backend PHP data using JavaScript and JSON APIs.
- Established company-wide coding standards for HTML, CSS, and JavaScript, carrying out cross-browser testing to preserve layout consistency
- Created custom email templates and campaign landing pages designed for broad client compatibility.
- Integrated Google Maps API features with custom markers and geolocation behaviors for a travel website agency named travelgator
- Used Grunt/Gulp build pipelines, and performance tools to boost mobile load times for projects. Brought the load-time that year to around 3.3 seconds

INTEGER PERFORM SRL | Head of IT Department/Web dev | Jan 2014 – May 2015

- Oversaw the entire IT infrastructure alongside website maintenance for internal systems.
- Designed custom, mobile-first responsive layouts using CSS media queries and preprocessors (LESS/SASS).
- Developed custom WordPress themes and provided team-wide training on jQuery, Grunt, and project tools (Asana, Trello).

Pascalini IT Solutions | Web Designer / Junior Front-End Developer | Jul 2012 – Aug 2013

- This is actually where I started and fell in love with the idea that a design I create can also be brought to life building web page layouts from visual mockups using HTML and CSS.
- Designed visual assets, UI elements, vector logos, and marketing materials in Adobe Photoshop and Illustrator.
- Also configured custom themes and store-front layouts across OpenCart, PrestaShop, and Magento platforms.
